Pursuing beauty  
Esthetic brn skin care line

## PURSUING BEAUTIFUL & AESTHETIC SKIN CARE

-For the beauty that leads to the future-

Due to global warming over the years, it has led to many environmental changes and climate changes. As a result, our skin undergoes different phases especially women. Women globally are encouraged to have the knowledge and understanding to have beautiful and healthy skin. ESTHE TWIN SKIN CARE LINE provides LM (Long Maturity) for women and it also helps to maintain a woman's beauty. "Beauty for the future", focuses on the main issue of the skin, with new and evolves LM Theory" that brightens the skin.

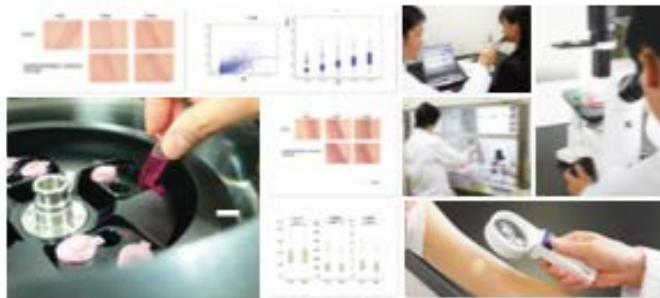

× 1 - Maintaining beautiful mature skin (fresh and beautiful skin)

## BLOOM CLASSIC Co.,Ltd. R & D efforts

### Huge amount of original skin analysis data accumulated

We have been developing aesthetic cosmetics based on the huge amount of skin analysis data collected from over 1 million women in 31 years.

### Cell Research that attracted attention

The Research on "Telomeres (ends of cell chromosomes)" and "iPS cells" were awarded the Nobel Prize in 2009 and 2012 in Medicine and Physiology.

In particular, iPS cells are cells called "stem cells" and have a special ability to differentiate into anything, and it is expected to realize modern medicine "regenerative medicine."

Also, in the cosmetic aspect, stem cells that produce new skin, called "TA-stem cells", are drawing attention.

BLOOM CLASSIC Co., Ltd. focuses on the function of skin cells.  
We have gathered cutting-edge information and have conducted research.

### Stem cells expected to realize regenerative medicine

As a result of repeated research based on the huge data such as skin analysis, we concluded that "stem cells" and "telomeres" are the main cause of skin aging.

### "Stem Cells" related to skin aging "Telomere" is the end of cell chromosome

"Stem Cells" regenerate skin cells and "Telomeres" helps to retain youthfulness of the skin and this is the essential step for women to keep their beauty and shiny skin.

THE FIRST STEP OF BEAUTY  
FROM KNOWING THE FUNCTION  
OF SKIN CELLS

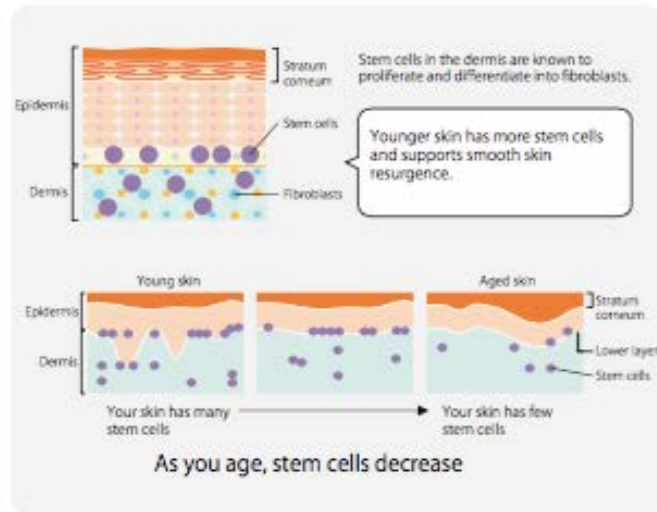

© All photos are images

The first step of beauty is from knowing the function of skin cells

## Your skin's **STEM CELLS** are the basis of beautiful skin

For youthful and healthy skin,  
Stem cells are abundant.

Stem cells provide new cells and support smooth skin transformation, maintaining fresh and beautiful skin. However, stem cell depletion does not produce new cells and the function of the skin declines, and various skin problems appear during skin aging

(Image)

POINT  When the cell's rebirth is smooth, the skin will be fresh and beautiful.

## Maintenance of "**TELOMERE**" Secret to beautiful skin

Telomere reduces with each cell division, leading to skin aging

(Image)

At the end of the chromosome in the cell, telomeres are present. We create new cells by cell division and carrying out life activities. When cells divide, chromosomes are copied and at the same time, telomeres reduce in size, aging effects such as wrinkles will occur. However, if telomeres do not extend, youthfulness can be maintained.

(Image)

POINT  It is necessary to maintain telomere to keep your skin beautiful for a long time.

## Cleansing & Foam

ESTHE TWIN SC  
**CLEANSING & FOAM**  
 200mL

**CLEANSING** Effective in removing oil base make up.

**FOAM** When used with water, fine bubbles will remove dirt and excess oil from your skin and prevent acne.

HOW TO USE

**[CLEANSING]** Take about 2-3 pumps (about 2-3 mL) and spread it evenly throughout the face. Gently blend with makeup. Then rinse with water or lukewarm water.

**[FOAM]** Add a small amount of water to pump 1-2 push (approx. 1-2 mL), lather well and gently bubble the whole face. I wash my face so as to wrap it up. Then rinse with water or lukewarm water.

## Toner lotion

ESTHE TWIN SC  
**TONER LOTION**  
 120mL

Familiar to the skin with a moist feeling of use, gives a rich moisture. Prevents rough and dry skin while keeping the skin smooth and resilient. Prepare for fresh skin.

HOW TO USE

After washing your face, take a dispenser 4-5 push (approx. 0.8-1 mL) <Value: 2 pumps (approx. 1 mL)> about 30 seconds to 1 minute as a guide and gently apply to the entire face.

## Revibeau ex

ESTHE TWIN SC  
REVIBEAU EX (SERUM)  
90mL

It is a special serum that moisturizes the skin keeps it shiny.  
Improves texture of skin and prevents rough skin.  
It delivers moisture to your skin (the stratum corneum)  
as if nano-level ingredients wrap your skin.

### HOW TO USE

After the lotion, take a 50 cents coin size (about 1 mL)  
and apply gently to the entire face.  
Please use plenty of morning and evening in  
the area of concern.

\*Although the ingredients may precipitate, there is  
no problem with the quality. Lightly shake before use.

50 cents coin size

## Calm ex

ESTHE TWIN SC
